THIS ARTICLE WILL EXPLORE THE DETAILS OF THIS SPECIFIC DISCOUNT, EXPLAIN HOW TO COMPUTE SALE PRICES, AND PROVIDE USEFUL TIPS ON SHOPPING SMARTLY FOR SPORTS GEAR.

UNDERSTANDING DISCOUNT PERCENTAGES AND SALE PRICES

BEFORE DIVING INTO THE SPECIFIC CALCULATIONS, IT'S IMPORTANT TO GRASP WHAT A PERCENTAGE DISCOUNT ENTAILS.

WHAT IS A DISCOUNT?

A DISCOUNT IS A REDUCTION IN THE ORIGINAL PRICE OF A PRODUCT, OFTEN EXPRESSED AS A PERCENTAGE. WHEN A RETAILER OFFERS A DISCOUNT, THEY ARE ESSENTIALLY SUBTRACTING A PORTION OF THE ORIGINAL PRICE TO MAKE THE ITEM MORE ATTRACTIVE TO BUYERS.

HOW DOES A 15% DISCOUNT WORK?

A 15% DISCOUNT MEANS THAT THE PRICE IS REDUCED BY 15% OF THE ORIGINAL PRICE. TO FIND THE SALE PRICE, YOU NEED TO:

1. CALCULATE 15% OF THE ORIGINAL PRICE.
2. SUBTRACT THAT AMOUNT FROM THE ORIGINAL PRICE.

THIS PROCESS ENSURES YOU UNDERSTAND EXACTLY HOW MUCH YOU ARE SAVING AND WHAT YOU WILL PAY.

CALCULATING THE SALE PRICE OF THE BASKETBALL

LET'S NOW FOCUS ON THE SPECIFIC EXAMPLE: A BASKETBALL ORIGINALLY PRICED AT \$39.99, DISCOUNTED BY 15%.

STEP-BY-STEP CALCULATION

STEP 1: CONVERT THE PERCENTAGE TO A DECIMAL

$$- 15\% = 15/100 = 0.15$$

STEP 2: CALCULATE THE DISCOUNT AMOUNT

$$- \text{DISCOUNT AMOUNT} = \text{ORIGINAL PRICE} \times \text{DISCOUNT RATE}$$

- DISCOUNT AMOUNT = $\$39.99 \times 0.15$

STEP 3: PERFORM THE MULTIPLICATION

- $\$39.99 \times 0.15 = \5.9985

STEP 4: ROUND THE DISCOUNT TO A SENSIBLE FIGURE

- SINCE PRICES ARE GENERALLY ROUNDED TO THE NEAREST CENT, THE DISCOUNT IS APPROXIMATELY \$6.00.

STEP 5: SUBTRACT THE DISCOUNT FROM THE ORIGINAL PRICE

- SALE PRICE = ORIGINAL PRICE - DISCOUNT AMOUNT

- SALE PRICE = $\$39.99 - \$6.00 = \$33.99$

RESULT:

THE BASKETBALL'S SALE PRICE, AFTER APPLYING A 15% DISCOUNT, IS APPROXIMATELY \$33.99.

RECENTLY, KEENAN DISCOVERED A FANTASTIC DEAL ON A BASKETBALL THAT WAS ON SALE FOR 15% OFF, MAKING IT AN EXCELLENT EXAMPLE OF HOW SAVVY SHOPPERS CAN SAVE MONEY WHILE STILL GETTING HIGH-QUALITY GEAR. IN THIS DETAILED REVIEW, WE WILL EXPLORE THE SPECIFICS OF THIS SALE, HOW TO CALCULATE THE NEW PRICE, AND WHAT FACTORS TO CONSIDER WHEN PURCHASING SPORTS EQUIPMENT DURING SALES EVENTS.

UNDERSTANDING THE DISCOUNT: THE 15% OFF SALE

BEFORE DIVING INTO THE CALCULATION DETAILS, IT'S ESSENTIAL TO UNDERSTAND WHAT A 15% DISCOUNT MEANS IN PRACTICAL TERMS. WHEN A RETAILER OFFERS A PRODUCT AT 15% OFF, IT SIGNIFIES THAT THE ORIGINAL PRICE IS REDUCED BY 15%, ALLOWING THE CUSTOMER TO PAY LESS THAN THE INITIAL RETAIL PRICE. THIS IS A COMMON PROMOTIONAL TACTIC USED TO CLEAR INVENTORY, ATTRACT NEW CUSTOMERS, OR PROMOTE SPECIFIC PRODUCTS.

KEY CONCEPTS TO GRASP:

- ORIGINAL PRICE: THE INITIAL LISTED PRICE OF THE PRODUCT BEFORE ANY DISCOUNTS.
- DISCOUNT RATE: THE PERCENTAGE BY WHICH THE PRICE IS REDUCED.
- SALE PRICE: THE FINAL PRICE AFTER APPLYING THE DISCOUNT.

IN KEENAN'S CASE, THE ORIGINAL PRICE OF THE BASKETBALL WAS \$39.99, AND THE DISCOUNT OFFERED WAS 15%. OUR GOAL IS TO DETERMINE WHAT THE SALE PRICE WAS AFTER APPLYING THIS DISCOUNT.

CALCULATING THE SALE PRICE

CALCULATING THE SALE PRICE INVOLVES A STRAIGHTFORWARD MATHEMATICAL PROCESS. THE CORE IDEA IS TO FIND OUT HOW MUCH MONEY IS TAKEN OFF THE ORIGINAL PRICE BASED ON THE DISCOUNT RATE AND THEN SUBTRACT THAT AMOUNT FROM THE ORIGINAL PRICE.

STEP-BY-STEP CALCULATION

1. CONVERT THE PERCENTAGE TO A DECIMAL:

TO WORK WITH THE DISCOUNT RATE MATHEMATICALLY, CONVERT 15% INTO DECIMAL FORM:

$$\begin{aligned} & \backslash[\\ & 15\% = 0.15 \\ & \backslash] \end{aligned}$$

2. CALCULATE THE DISCOUNT AMOUNT:

MULTIPLY THE ORIGINAL PRICE BY THE DECIMAL DISCOUNT:

$$\begin{aligned} & \backslash[\\ & \text{Discount Amount} = \text{Original Price} \times 0.15 \\ & \backslash] \end{aligned}$$

FOR KEENAN'S BASKETBALL:

$$\begin{aligned} & \backslash[\\ & \$39.99 \times 0.15 = \$5.9985 \\ & \backslash] \end{aligned}$$

3. ROUND THE DISCOUNT AMOUNT:

SINCE CURRENCY TYPICALLY ROUNDS TO TWO DECIMAL PLACES,

$$\begin{aligned} & \backslash[\\ & \$5.9985 \approx \$6.00 \\ & \backslash] \end{aligned}$$

4. SUBTRACT THE DISCOUNT FROM THE ORIGINAL PRICE:

$$\begin{aligned} & \backslash[\\ & \text{Sale Price} = \text{Original Price} - \text{Discount Amount} \\ & \backslash] \end{aligned}$$

$$\begin{aligned} & \backslash[\\ & \$39.99 - \$6.00 = \$33.99 \\ & \backslash] \end{aligned}$$

RESULT: THE SALE PRICE OF THE BASKETBALL, AFTER A 15% DISCOUNT, WAS APPROXIMATELY \$33.99.
