The Format of the Exercise

The task is to underline the word in parentheses that best completes the sentence.

Strategies for Completing Sentence Completion Exercises Effectively

1. Read the Entire Sentence Carefully

Before considering the options, read the full sentence to grasp its meaning and context. Understanding the overall message helps in selecting the most appropriate word.

2. Analyze the Context

Identify clues within the sentence:

- Subject: Who or what is the sentence about?
- Verb: What action is happening?
- Modifiers: Are there adjectives or adverbs that influence word choice?
- Tone and Style: Formal, informal, positive, negative, etc.

3. Consider the Grammar and Syntax

Check if the sentence requires:

- A noun, pronoun, or adjective.
- A verb in a specific tense.
- A word that agrees in number and person.

4. Eliminate Implausible Options

Cross out words that do not fit grammatically or contextually. Narrowing down choices increases the chances of selecting the correct answer.

5. Use Context Clues and Logical Reasoning

Think about what makes sense in the sentence:

- Does the word logically complete the idea?
- Does it match the tone or mood?

Common Types of Words in Parentheses and How to Choose Them

Understanding the types of words typically found in parentheses aids in making correct selections:

1. Synonyms and Antonyms

- Words that have similar or opposite meanings.
- Example: Patrick was (happy, sad) to see his friend.

2. Different Parts of Speech

- Nouns, verbs, adjectives, or adverbs.
- Example: He runs (quickly, quick) every morning.

3. Tenses and Forms

- Present, past, future forms.
- Example: She (go, went, gone) to the market yesterday.

4. Quantifiers and Degree Words

- Words indicating amount or intensity.
- Example: There are (many, much) apples on the table.

Practical Example: Analyzing a Sample Sentence

Let's examine a typical exercise sentence:

> Patrick asked his (brother, sister, cousin) to help him with his homework.

Step 1: Read the sentence carefully.

Step 2: Identify context clues.

- The subject is Patrick, who is asking someone for help.
- The options are family members.

Step 3: Consider grammatical agreement.

- The phrase "his" indicates a singular family member.
- All options are singular nouns.

Step 4: Determine which word best fits the context.

- Since Patrick is asking a family member, "brother" or "sister" could both fit, but if additional context mentions gender, that could guide the choice.
- If the sentence specifies Patrick is male, "brother" is appropriate; if female, "sister."

Step 5: Final selection.

- Assuming no gender info, both are plausible, but logically, the sentence might prefer "brother" if Patrick is male or "sister" if female.

Answer: Underline the correct word based on context.
