Understanding Verb Conjugation Basics

What is verb conjugation?

Verb conjugation involves modifying a verb to reflect various grammatical categories such as tense, person, number, mood, and aspect.

Key components of verb conjugation

- Tense: Past, Present, Future
- Person: First, Second, Third
- Number: Singular, Plural
- Mood: Indicative, Subjunctive, Imperative
- Aspect: Simple, Progressive, Perfect

Approach to Completing Sentences with the Correct Verb

Step 1: Analyze the Sentence Context

Determine the overall meaning and time frame suggested by the sentence.

- Is it talking about a past event, an ongoing action, or a future plan?
- Are there any time indicators like yesterday, now, tomorrow?

Step 2: Identify the Subject and Its Number

- Singular subjects: he, she, it, the dog
- Plural subjects: they, we, the students

Match the verb conjugation accordingly.

Step 3: Determine the Correct Tense and Mood

Based on context, decide whether the verb should be in the past, present, or future tense, and whether it should be indicative, subjunctive, or imperative.

Step 4: Select and Conjugate the Verb

Apply standard conjugation rules or irregular verb forms as necessary.

Common Verb Conjugation Rules and Patterns

Regular Verbs

- Present tense: add -s or -es for third person singular (e.g., run → runs)
- Past tense: add -ed (e.g., walk → walked)

Irregular Verbs

- Past tense forms vary (e.g., go → went, see → saw)
- Must be memorized or referenced from irregular verb lists
