

THERE ARE 130 PEOPLE IN A SPORTS CENTRE. 65 PEOPLE USE THE GYM 51 PEOPLE USE THE SWIMMING POOL, 44 PEOPLE

THERE ARE 130 PEOPLE IN A SPORTS CENTRE. 65 PEOPLE USE THE GYM 51 PEOPLE USE THE SWIMMING POOL, 44 PEOPLE

INTRODUCTION

A BUSTLING SPORTS CENTRE CAN BE A HUB OF ACTIVITY, FITNESS, AND LEISURE. WITH A TOTAL OF 130 PEOPLE PRESENT AT ANY GIVEN TIME, UNDERSTANDING HOW THESE INDIVIDUALS UTILIZE THE FACILITIES PROVIDES VALUABLE INSIGHTS INTO THE CENTRE'S POPULARITY AND OPERATIONAL EFFICIENCY. IN THIS ARTICLE, WE DELVE INTO THE DETAILS OF THE SPORTS CENTRE'S USAGE PATTERNS, FOCUSING ON THE NUMBER OF PEOPLE USING THE GYM, SWIMMING POOL, AND OTHER AMENITIES. WE WILL EXPLORE HOW THESE FIGURES RELATE, WHAT OVERLAPS MIGHT EXIST, AND HOW THE CENTRE CAN OPTIMIZE ITS SERVICES TO MEET THE NEEDS OF ITS VISITORS.

UNDERSTANDING THE BASIC STATISTICS

THE OPENING STATEMENT SETS THE STAGE:

- TOTAL PEOPLE IN THE SPORTS CENTRE: 130
- PEOPLE USING THE GYM: 65
- PEOPLE USING THE SWIMMING POOL: 51
- REMAINING PEOPLE (POSSIBLY USING OTHER FACILITIES): 44

THESE FIGURES GIVE US A SNAPSHOT OF THE CENTRE'S CAPACITY AND THE POPULARITY OF SPECIFIC FACILITIES. HOWEVER, TO GAIN A DEEPER UNDERSTANDING, WE NEED TO ANALYZE HOW THESE GROUPS OVERLAP AND WHAT PERCENTAGE OF THE TOTAL THEY REPRESENT.

BREAKDOWN OF FACILITY USAGE

GYM USAGE

- 65 INDIVIDUALS ARE USING THE GYM, WHICH ACCOUNTS FOR 50% OF THE TOTAL VISITORS.
- THE GYM IS A POPULAR FACILITY, LIKELY DRAWING HALF OF THE VISITORS AT ANY GIVEN TIME.

SWIMMING POOL USAGE

- 51 INDIVIDUALS ARE USING THE SWIMMING POOL, ROUGHLY 39.23% OF THE TOTAL.
- SWIMMING POOLS TEND TO ATTRACT SPECIFIC GROUPS, SUCH AS SWIMMERS, FAMILIES, OR THOSE SEEKING LOW-IMPACT EXERCISE.

OTHER FACILITIES AND USERS

- 44 PEOPLE ARE EITHER USING OTHER FACILITIES LIKE COURTS, SQUASH ROOMS, OR ARE IN THE LOUNGE OR WAITING AREAS.
- THE SUM OF GYM AND POOL USERS ($65 + 51 = 116$) PLUS OTHERS (44) TOTALS 160, WHICH EXCEEDS THE TOTAL OF 130, INDICATING OVERLAPS OR SHARED USAGE.

ANALYZING OVERLAPS AND SHARED USAGE

GIVEN THAT THE SUM OF INDIVIDUALS USING THE GYM AND SWIMMING POOL EXCEEDS THE TOTAL NUMBER OF PEOPLE PRESENT, IT SUGGESTS THAT SOME INDIVIDUALS ARE USING MULTIPLE FACILITIES SIMULTANEOUSLY OR DURING DIFFERENT TIMES WITHIN THEIR VISIT.

POSSIBLE SCENARIOS:

- OVERLAP IN FACILITY USAGE: SOME VISITORS MIGHT BE USING BOTH THE GYM AND THE SWIMMING POOL DURING THEIR VISIT, SUCH AS INDIVIDUALS WHO WORK OUT IN THE GYM AND THEN SWIM FOR RELAXATION OR COOL DOWN.
- DIFFERENT TIME SLOTS: THE NUMBERS COULD REPRESENT PEAK USAGE AT DIFFERENT TIMES, WITH SOME PEOPLE ATTENDING DIFFERENT FACILITIES AT DIFFERENT TIMES DURING THE DAY.
- SHARED FACILITY USERS: SOME VISITORS MAY BE COUNTED IN MULTIPLE CATEGORIES IF THEY SWITCH FACILITIES FREQUENTLY.

CALCULATING OVERLAP

TO UNDERSTAND THE EXTENT OF THIS OVERLAP, WE CAN USE THE PRINCIPLE OF SET THEORY:

- TOTAL VISITORS (T) = 130
- GYM USERS (G) = 65
- POOL USERS (P) = 51
- OTHER USERS (O) = 44

ASSUMING SOME OVERLAP, THE TOTAL NUMBER OF UNIQUE USERS CAN BE ESTIMATED WITH THE FORMULA:

$$\text{TOTAL UNIQUE USERS} = G + P + O - (\text{NUMBER OF OVERLAPS})$$

SINCE THE TOTAL CANNOT EXCEED 130, OVERLAPS ARE INEVITABLE.

MAXIMUM POSSIBLE OVERLAPS:

- IF ALL GYM USERS ALSO USED THE POOL AND OTHER FACILITIES, THE OVERLAPS WOULD BE MAXIMIZED.
- CONVERSELY, IF ALL GROUPS ARE DISJOINT, THE TOTAL WOULD SUM TO MORE THAN 130, WHICH IS IMPOSSIBLE.

ESTIMATING OVERLAPS:

- THE SUM $G + P + O = 65 + 51 + 44 = 160$
- SINCE TOTAL PEOPLE ARE 130, THE TOTAL OVERLAPS AMONG THESE GROUPS ARE APPROXIMATELY 30 ($160 - 130$).

THEREFORE, AROUND 30 INDIVIDUALS MIGHT BE USING MULTIPLE FACILITIES SIMULTANEOUSLY OR DURING THEIR VISIT.

IMPLICATIONS FOR THE SPORTS CENTRE MANAGEMENT

UNDERSTANDING THESE OVERLAPS IS CRUCIAL FOR EFFICIENT RESOURCE ALLOCATION, SCHEDULING, AND IMPROVING CUSTOMER SATISFACTION.

FACILITY SCHEDULING AND MAINTENANCE

- KNOWING PEAK TIMES FOR GYM AND POOL USAGE HELPS IN SCHEDULING STAFF AND MAINTENANCE.
- MANAGING OVERCROWDING ENSURES SAFETY AND COMFORT FOR VISITORS.

MEMBERSHIP AND USAGE POLICIES

- THE DATA SUGGESTS THAT MANY VISITORS ARE MULTI-FACILITY USERS.
- OFFERING COMBINED MEMBERSHIPS OR MULTI-FACILITY PACKAGES COULD BE APPEALING.

ENHANCING VISITOR EXPERIENCE

- ENSURING FACILITIES ARE WELL-MAINTAINED AND ACCESSIBLE DURING BUSY HOURS.
- CREATING PROGRAMS THAT ENCOURAGE BALANCED USAGE ACROSS ALL FACILITIES TO PREVENT OVERCROWDING IN SPECIFIC AREAS.

ADDITIONAL CONSIDERATIONS

ANALYZING DEMOGRAPHICS

- UNDERSTANDING WHICH AGE GROUPS OR DEMOGRAPHICS PREFER CERTAIN FACILITIES CAN HELP TAILOR SERVICES.
- FOR EXAMPLE, FAMILIES MIGHT PREFER SWIMMING, WHEREAS YOUNG ADULTS MIGHT FAVOR THE GYM.

HEALTH AND SAFETY MEASURES

- OVERLAPPING USAGE INCREASES THE IMPORTANCE OF HYGIENE AND SAFETY PROTOCOLS.
- REGULAR SANITIZATION, CAPACITY LIMITS, AND CLEAR SIGNAGE ARE VITAL.

FUTURE PLANNING

- IF POPULARITY INCREASES, EXPANDING FACILITIES OR ADDING NEW AMENITIES MIGHT BE NECESSARY.

- INVESTING IN SCHEDULING SOFTWARE CAN HELP MANAGE OVERLAPPING USAGE MORE EFFICIENTLY.

CONCLUSION

THE STATISTICS INDICATING THAT 130 PEOPLE ARE PRESENT IN A SPORTS CENTRE WITH 65 USING THE GYM, 51 USING THE SWIMMING POOL, AND 44 ENGAGING IN OTHER ACTIVITIES REVEAL A VIBRANT AND ACTIVE ENVIRONMENT. WHILE THE NUMBERS SUGGEST OVERLAPS IN FACILITY USAGE, UNDERSTANDING THESE PATTERNS IS ESSENTIAL FOR EFFECTIVE MANAGEMENT AND ENHANCING THE OVERALL VISITOR EXPERIENCE. BY ANALYZING USAGE TRENDS AND OVERLAPS, THE SPORTS CENTRE CAN OPTIMIZE ITS FACILITIES, STAFF SCHEDULING, AND PROGRAMS TO SERVE ITS PATRONS BETTER. WHETHER THROUGH EXPANDING CAPACITY, INTRODUCING NEW SERVICES, OR REFINING OPERATIONAL STRATEGIES, LEVERAGING THESE INSIGHTS WILL HELP SUSTAIN THE CENTRE'S POPULARITY AND ENSURE IT REMAINS A PREMIER DESTINATION FOR HEALTH AND RECREATION.

KEYWORDS FOR SEO OPTIMIZATION:

- SPORTS CENTRE USAGE STATISTICS
- GYM AND SWIMMING POOL ATTENDANCE
- FACILITY MANAGEMENT IN SPORTS CENTRES
- OVERLAPPING FACILITY USAGE
- OPTIMIZING SPORTS CENTRE OPERATIONS
- VISITOR CAPACITY AND SAFETY
- MULTI-FACILITY MEMBERSHIPS
- SPORTS CENTRE PLANNING AND MANAGEMENT

FREQUENTLY ASKED QUESTIONS

HOW MANY PEOPLE IN THE SPORTS CENTRE USE EITHER THE GYM OR THE SWIMMING POOL?

TO FIND THE TOTAL NUMBER OF PEOPLE USING EITHER THE GYM OR THE POOL, WE CAN USE THE INCLUSION-EXCLUSION PRINCIPLE:
 $65 \text{ (GYM)} + 51 \text{ (POOL)} - 44 \text{ (BOTH)} = 72 \text{ PEOPLE.}$

HOW MANY PEOPLE DO NOT USE EITHER THE GYM OR THE SWIMMING POOL?

TOTAL PEOPLE ARE 130. PEOPLE USING EITHER OR BOTH FACILITIES ARE 72. THEREFORE, THE NUMBER OF PEOPLE USING NEITHER IS $130 - 72 = 58$.

HOW MANY PEOPLE USE BOTH THE GYM AND THE SWIMMING POOL?

44 PEOPLE USE BOTH THE GYM AND THE SWIMMING POOL.

WHAT IS THE NUMBER OF PEOPLE WHO USE ONLY THE GYM?

PEOPLE WHO USE ONLY THE GYM = TOTAL GYM USERS - BOTH = $65 - 44 = 21$.

WHAT IS THE NUMBER OF PEOPLE WHO USE ONLY THE SWIMMING POOL?

PEOPLE WHO USE ONLY THE SWIMMING POOL = TOTAL POOL USERS - BOTH = $51 - 44 = 7$.

IS IT POSSIBLE FOR SOMEONE TO USE NEITHER FACILITY?

YES, SINCE 58 PEOPLE DO NOT USE EITHER THE GYM OR THE POOL, IT IS POSSIBLE FOR SOME INDIVIDUALS TO USE NEITHER.

WHAT PERCENTAGE OF THE TOTAL PEOPLE IN THE SPORTS CENTRE USE THE GYM?

PERCENTAGE USING THE GYM = $(65 / 130) 100 = 50\%$.

WHAT PERCENTAGE OF THE TOTAL PEOPLE IN THE SPORTS CENTRE USE THE SWIMMING POOL?

PERCENTAGE USING THE POOL = $(51 / 130) 100 \approx 39.23\%$.

HOW MANY PEOPLE IN TOTAL USE AT LEAST ONE OF THE FACILITIES?

TOTAL USING AT LEAST ONE FACILITY = 72 PEOPLE.

ADDITIONAL RESOURCES

THERE ARE 130 PEOPLE IN A SPORTS CENTRE. 65 PEOPLE USE THE GYM, 51 PEOPLE USE THE SWIMMING POOL, 44 PEOPLE - THESE NUMBERS PAINT AN INTRIGUING PICTURE OF THE FACILITY'S USAGE PATTERNS. WHETHER YOU'RE A SPORTS FACILITY MANAGER, A DATA ANALYST, OR SIMPLY CURIOUS ABOUT HOW PEOPLE UTILIZE SHARED SPACES, UNDERSTANDING THE DISTRIBUTION AND OVERLAP OF USERS CAN OFFER VALUABLE INSIGHTS. IN THIS COMPREHENSIVE GUIDE, WE'LL EXPLORE HOW TO INTERPRET THESE FIGURES, ANALYZE POTENTIAL OVERLAPS, AND CONSIDER THE IMPLICATIONS FOR MANAGEMENT AND PLANNING.

UNDERSTANDING THE BASIC DATA

AT FIRST GLANCE, THE NUMBERS SEEM STRAIGHTFORWARD:

- TOTAL PEOPLE IN THE SPORTS CENTRE: 130
- NUMBER OF PEOPLE USING THE GYM: 65
- NUMBER OF PEOPLE USING THE SWIMMING POOL: 51
- NUMBER OF PEOPLE USING SOME OTHER FACILITIES (IMPLIED): 44

HOWEVER, THESE FIGURES ALONE DON'T TELL THE FULL STORY. THEY RAISE SEVERAL QUESTIONS:

- DO THESE GROUPS OVERLAP? ARE SOME PEOPLE USING BOTH THE GYM AND THE SWIMMING POOL?
- ARE THE 44 PEOPLE USING OTHER FACILITIES SEPARATE FROM THE GYM AND POOL USERS, OR DO SOME OVERLAP EXIST?
- WHAT IS THE TOTAL NUMBER OF UNIQUE USERS ACROSS ALL FACILITIES?

LET'S EXPLORE THESE QUESTIONS SYSTEMATICALLY.

INTERPRETING THE OVERLAP OF FACILITY USAGE

WHEN ANALYZING MULTIPLE GROUPS WITHIN A TOTAL POPULATION, THE KEY CONCEPT IS SET THEORY — SPECIFICALLY, THE RELATIONSHIPS BETWEEN DIFFERENT SETS OF USERS.

SUPPOSE WE DEFINE:

- G: SET OF PEOPLE USING THE GYM
- P: SET OF PEOPLE USING THE SWIMMING POOL
- O: SET OF PEOPLE USING OTHER FACILITIES

GIVEN DATA:

FACILITY	NUMBER OF USERS
Gym (G)	65
Swimming Pool (P)	51
Other Facilities (O)	44
TOTAL PEOPLE IN CENTRE	130

THE MAIN GOAL IS TO DETERMINE:

- HOW MANY USERS ARE EXCLUSIVE TO EACH FACILITY?
- HOW MANY PEOPLE USE MULTIPLE FACILITIES?
- WHAT IS THE MINIMAL AND MAXIMAL POSSIBLE OVERLAP?

APPLYING THE PRINCIPLE OF INCLUSION-EXCLUSION

THE PRINCIPLE OF INCLUSION-EXCLUSION (PIE) HELPS US ACCOUNT FOR OVERLAPS.

THE FORMULA FOR THE UNION OF THREE SETS IS:

$$|G \cup P \cup O| = |G| + |P| + |O| - |G \cap P| - |G \cap O| - |P \cap O| + |G \cap P \cap O|$$

GIVEN THAT THE TOTAL NUMBER OF PEOPLE IS 130:

$$130 \geq |G \cup P \cup O|$$

SINCE ALL USERS ARE WITHIN THE TOTAL, THE UNION CAN'T EXCEED 130.

CALCULATING OVERLAP SCENARIOS

SCENARIO 1: NO OVERLAP (MUTUALLY EXCLUSIVE USAGE)

IF NOBODY USES MORE THAN ONE FACILITY:

- SUM OF INDIVIDUAL USERS: $65 + 51 + 44 = 160$
- BUT TOTAL USERS ARE 130, SO:

$$160 - 130 = 30$$

THIS INDICATES THAT AT LEAST 30 USERS ARE COUNTED MORE THAN ONCE IF THERE'S NO OVERLAP, WHICH IS IMPOSSIBLE SINCE OVERLAPS WOULD REDUCE THE TOTAL COUNTED USERS.

IN FACT, IF NO OVERLAPS EXISTED, TOTAL USERS WOULD BE 160, EXCEEDING THE TOTAL POPULATION OF 130. THEREFORE,

OVERLAPS ARE INEVITABLE.

SCENARIO 2: MAXIMAL OVERLAP (EVERYONE USES ALL FACILITIES)

IF ALL 130 USERS USE ALL THREE FACILITIES:

- TOTAL USERS: 130
- SUM OF INDIVIDUAL COUNTS: 160
- TOTAL OVERLAPS: $160 - 130 = 30$

IN THIS CASE, THE MAXIMUM POSSIBLE OVERLAP IS 130 USERS, BUT THE COUNTS SUGGEST THAT NOT EVERYONE USES ALL THREE. THE REAL OVERLAPS ARE SOMEWHERE BETWEEN THESE EXTREMES.

SCENARIO 3: OVERLAP BETWEEN GYM AND POOL ONLY

SUPPOSE:

- SOME USERS USE BOTH GYM AND POOL
- OTHERS USE ONLY ONE FACILITY OR THE OTHER
- THE OTHER 44 USERS ARE EXCLUSIVE TO OTHER FACILITIES OR POSSIBLY OVERLAPPING WITH GYM AND/OR POOL USERS

LET'S DENOTE:

- X: NUMBER OF USERS WHO USE BOTH GYM AND POOL
- Y: NUMBER OF USERS WHO USE ONLY GYM
- Z: NUMBER OF USERS WHO USE ONLY POOL
- W: NUMBER OF USERS WHO USE ONLY OTHER FACILITIES
- V: NUMBER OF USERS WHO USE ALL THREE FACILITIES

TOTAL USERS:

$$Y + Z + W + X + V = 130$$

FROM THE DATA:

- USERS OF GYM: $Y + X + V = 65$
- USERS OF POOL: $Z + X + V = 51$
- USERS OF OTHERS: $W + Y + Z + X + V = 44$

WITH THESE, WE CAN ATTEMPT TO ESTIMATE OVERLAPS.

ESTIMATING OVERLAPS AND EXCLUSIVE USERS

TO GET A CLEARER PICTURE, CONSIDER THE FOLLOWING ASSUMPTIONS:

- SOME USERS ARE EXCLUSIVE TO EACH FACILITY.
- THE OVERLAPS ARE SPREAD AMONG THE USERS.

USING THE DATA, WE CAN SET UP THE EQUATIONS:

1. GYM TOTAL: $Y + X + V = 65$

2. POOL TOTAL: $z + x + v = 51$

3. OTHERS TOTAL: $w + y + z + x + v = 44$

4. TOTAL USERS: $y + z + w + x + v = 130$

FROM EQUATIONS 1 AND 2:

$$-y = 65 - x - v$$

$$-z = 51 - x - v$$

PLUG INTO EQUATION 4:

$$(65 - x - v) + (51 - x - v) + w + x + v = 130$$

SIMPLIFY:

$$(65 + 51) - x - v - x - v + w + x + v = 130$$

$$130 - x - v - x - v + w + x + v = 130$$

COMBINE LIKE TERMS:

$$130 + (-x - x + x) + (-v - v + v) + w = 130$$

$$130 - x - v + w = 130$$

SUBTRACT 130 FROM BOTH SIDES:

$$-x - v + w = 0$$

REARRANGED:

$$w = x + v$$

NOW, FROM THE TOTAL OF OTHER FACILITIES:

$$w + y + z + x + v = 44$$

SUBSTITUTE Y AND Z:

$$w + (65 - x - v) + (51 - x - v) + x + v = 44$$

SIMPLIFY:

$$w + 65 - x - v + 51 - x - v + x + v = 44$$

COMBINE CONSTANTS:

$$(65 + 51) + w - x - v - x - v + x + v = 44$$

$$116 + w - x - v - x - v + x + v = 44$$

NOW, COMBINE LIKE TERMS:

$$116 + w + (-x - x + x) + (-v - v + v) = 44$$

$$116 + w - x - v = 44$$

RECALL THAT $w = x + v$, SO:

$$116 + x + v - x - v = 44$$

THE X AND V CANCEL OUT:

$$116 = 44$$

THIS IS A CONTRADICTION, INDICATING THAT WITH THE INITIAL ASSUMPTIONS, THE SCENARIO IS IMPOSSIBLE.

IMPLICATIONS AND REALISTIC INTERPRETATIONS

THE MATHEMATICAL CONTRADICTIONS SUGGEST THAT THE INITIAL ASSUMPTIONS ABOUT OVERLAPS BEING ARBITRARY ARE INVALID. REALISTICALLY, THE DATA POINTS TOWARD CERTAIN CONSTRAINTS:

- THERE ARE OVERLAPS BETWEEN GYM AND POOL USERS.
- SOME USERS MAY BE USING OTHER FACILITIES WITHOUT OVERLAPPING WITH GYM OR POOL.
- THE TOTAL NUMBER OF USERS IN OVERLAPPING GROUPS CANNOT EXCEED THE TOTAL OF 130.

KEY TAKEAWAYS:

- THE SUM OF INDIVIDUAL FACILITY USERS (160) EXCEEDS TOTAL USERS (130), INDICATING OVERLAPS.
- AT LEAST 30 USERS ARE USING MORE THAN ONE FACILITY.
- THE MINIMAL OVERLAP OCCURS WHEN MOST USERS ARE EXCLUSIVE, AND THE MAXIMUM WHEN MANY USERS ARE SHARED ACROSS MULTIPLE FACILITIES.

PRACTICAL APPLICATIONS: FACILITY MANAGEMENT AND PLANNING

UNDERSTANDING THESE OVERLAPS IS VITAL FOR EFFECTIVE MANAGEMENT. HERE'S HOW FACILITY MANAGERS CAN LEVERAGE THIS DATA:

1. CAPACITY PLANNING

- GYM: WITH 65 USERS, ENSURE ADEQUATE EQUIPMENT AND SPACE.
- SWIMMING POOL: WITH 51 USERS, MAINTAIN SAFETY AND CLEANLINESS STANDARDS.
- OTHER FACILITIES: FOR THE 44 USERS, CONSIDER SPACE, STAFFING, AND RESOURCE ALLOCATION.

2. SCHEDULING AND PEAK TIMES

- OVERLAPPING USERS SUGGEST PEAK PERIODS WHEN MULTIPLE FACILITIES ARE IN USE.
- SCHEDULING CLASSES OR MAINTENANCE DURING OFF-PEAK TIMES CAN OPTIMIZE USAGE.

3. MEMBERSHIP AND PROMOTION STRATEGIES

- ENCOURAGE MULTI-FACILITY USAGE THROUGH BUNDLED MEMBERSHIPS.
- OFFER INCENTIVES TO USERS WHO UTILIZE MULTIPLE FACILITIES.

4. DATA COLLECTION AND ANALYSIS

- IMPLEMENT SIGN-IN SYSTEMS TO TRACK ACTUAL OVERLAPS.
- USE SURVEYS OR DIGITAL CHECK-INS TO REFINE UNDERSTANDING OF USER BEHAVIOR.

5. RESOURCE ALLOCATION

- ADJUST STAFFING LEVELS BASED ON OVERLAPPING USAGE PATTERNS.
- ENSURE EQUIPMENT AND AMENITIES ARE SUFFICIENT FOR THE OVERLAPPING USER BASE.

CONCLUSION: THE POWER OF DATA IN ENHANCING FACILITY USAGE

WHILE THE INITIAL NUMBERS—130 TOTAL USERS, 65 USING THE GYM, 51 IN THE POOL, AND 44 IN OTHER FACILITIES—PROVIDE A SNAPSHOT, THEY OPEN THE DOOR TO DEEPER ANALYSIS. RECOGNIZING OVERLAPS, EXCLUSIVE USAGE, AND USER BEHAVIOR PATTERNS ALLOWS SPORTS CENTRE MANAGERS TO OPTIMIZE OPERATIONS, IMPROVE CUSTOMER EXPERIENCE, AND PLAN FUTURE EXPANSIONS OR UPGRADES.

UNDERSTANDING SET RELATIONSHIPS AND APPLYING PRINCIPLES LIKE INCLUSION-EXCLUSION HELPS TURN RAW DATA INTO ACTIONABLE INSIGHTS. IN AN INCREASINGLY COMPETITIVE ENVIRONMENT, SUCH DATA-DRIVEN STRATEGIES

There Are 130 People In A Sports Centre 65 People Use The Gym 51 People Use The Swimming Pool 44 People

There Are 130 People In A Sports Centre 65 People Use The Gym 51 People Use The Swimming Pool 44 People
