Fill In The Blanks With The Correct Passive Form Of The Verb In Brackets .A New Sports And Athletic Centre

Introduction

In the realm of sports and athletic development, the construction of new facilities plays a pivotal role in promoting healthy lifestyles and fostering community engagement. A new sports and athletic centre has recently been constructed in the city, providing state-of-the-art amenities for athletes, students, and fitness enthusiasts alike. To fully appreciate the significance of this development, it is essential to understand the grammatical concept of passive voice, particularly how to fill in the blanks with the correct passive form of verbs in brackets. This article explores the importance of passive voice in describing construction projects, the features of the new centre, and provides exercises for mastering the use of passive forms.

Understanding the Passive Voice in English

What Is the Passive Voice?

The passive voice is a grammatical construction where the focus is shifted from the doer of an action to the recipient of the action. In passive sentences, the object of an active sentence becomes the subject, and the verb is typically combined with a form of "to be" and the past participle of the main verb.

Why Use the Passive Voice?

- To emphasize the action rather than the actor.
- When the doer is unknown or unimportant.
- To maintain a formal or objective tone, especially in technical writing or reports.

Examples of Passive Voice

- Active: The city built the new sports centre.
- Passive: The new sports centre was built by the city.

Construction of the New Sports and Athletic Centre

The Planning Phase

The planning phase of the new sports centre was overseen by city officials and urban planners. During this phase, several activities (conduct) to ensure the project met community needs.

Exercise: Fill in the blank with the correct passive form:

The initial surveys (conduct) to assess the community's requirements.

Answer: The initial surveys were conducted to assess the community's requirements.

The Design and Approval Process

Once the planning was completed, the architectural designs (approve) by relevant authorities. The designs (review) to ensure they adhered to safety and accessibility standards.

Exercise:

The architectural plans (review) before the construction could commence.

Answer: The architectural plans were reviewed before the construction could commence.

Construction of the Sports Centre

Groundbreaking and Foundation Work

The construction process (start) early last year, with the groundbreaking ceremony attended by local officials and community members. The foundation (lay) by skilled workers and engineers.

Exercise:

The foundation (lay) by a team of experienced workers.

Answer: The foundation was laid by a team of experienced workers.

Building the Structure

The main structure of the centre (erect) over several months. Modern construction techniques (use) to ensure durability and sustainability.

Exercise:

Modern construction techniques (use) throughout the building process.

Answer: Modern construction techniques were used throughout the building process.

Installing Equipment and Amenities

Once the structure (complete), interior work (start), including the installation of sports equipment, lighting, and ventilation systems.

Exercise:

The interior fixtures and equipment (install) after the main structure was completed.

Answer: The interior fixtures and equipment were installed after the main structure was completed.

Features of the New Sports and Athletic Centre

State-of-the-Art Facilities

The centre (equip) with the latest fitness and sports technology. Facilities such as swimming pools, gymnasiums, indoor courts, and running tracks (install) to cater to diverse athletic needs.

Exercise:

The latest technology (install) in all fitness areas.

Answer: The latest technology was installed in all fitness areas.

Accessibility and Community Engagement

The design (incorporate) accessibility features to accommodate individuals with disabilities. Community programs and training sessions (offer) regularly to promote active lifestyles.

Exercise:

Various community programs (offer) to encourage participation.

Answer: Various community programs are offered to encourage participation.

The Impact of the New Sports and Athletic Centre

Benefits for the Community

The new centre (provide) numerous benefits, including improved health outcomes, increased youth engagement, and economic development. Local schools and sports clubs (use) the facilities for training and competitions.

Exercise:

The facilities (use) by local schools and sports clubs.

Answer: The facilities are used by local schools and sports clubs.

Environmental Sustainability

The project (designed) with sustainability in mind. Solar panels (install) on the roof, and energy-efficient systems (implement) throughout the centre.

Exercise:

Renewable energy sources (incorporate) into the building design.

Answer: Renewable energy sources were incorporated into the building design.

Future Developments and Maintenance

Ongoing Upgrades

The management team (plan) to upgrade the facilities regularly. Maintenance work (perform) to ensure safety and functionality.

Exercise:

Regular maintenance work (perform) to keep the centre in top condition.

Answer: Regular maintenance work is performed to keep the centre in top condition.

Community Feedback and Improvements

Feedback from users (collect) to identify areas for improvement. New features and programs (introduce) based on community needs.

Exercise:

Feedback (collect) to inform future enhancements.

Answer: Feedback is collected to inform future enhancements.

Conclusion

The construction and operation of a new sports and athletic centre involve numerous processes that are best described using the passive voice. Mastering the use of the passive form of verbs in brackets is essential for clear, formal, and objective communication, particularly in reports and descriptions related to construction projects. By understanding how to correctly fill in the blanks with the passive form, learners can enhance their grammatical accuracy and fluency.

Whether discussing the planning, building, or ongoing management of the facility, the passive voice allows us to focus on the action and its results, rather than the actor. This focus is especially relevant in technical and formal contexts, such as the development of a community sports centre, where the emphasis is on the achievement and features of the project.

Additional Tips for Practicing Passive Voice

- Always identify the tense required in the sentence.
- Remember that the passive form uses the appropriate form of "to be" plus the past participle.
- Use online exercises and quizzes to practice filling in the blanks.
- Read technical reports and articles to see passive constructions in context.

Final Words

The successful completion of the new sports and athletic centre marks a significant milestone for the community. It is a testament to effective planning, construction, and management, all of which are best communicated through the correct use of the passive voice. By mastering this grammatical structure, writers and speakers can convey information more precisely and professionally.

Fill In The Blanks With The Correct Passive Form Of The Verb In Brackets .A New Sports And Athletic Centre

Introduction

The unveiling of a new sports and athletic centre marks a significant milestone in the development of community infrastructure dedicated to promoting health, fitness, and recreational activities. Such facilities are designed not only to encourage active lifestyles but also to foster social cohesion and inspire excellence in sports. When discussing the construction, features, and impact of these centres, precise language use becomes essential, especially in educational and professional contexts. One common grammatical exercise involves filling in the blanks with the correct passive form of verbs provided in brackets. This task tests understanding of tense, voice, and sentence structure, which are crucial for clear and accurate communication. In this article, we explore a comprehensive review of a newly established sports and athletic centre, focusing on how to correctly apply passive voice constructions in a journalistic or analytical tone, while offering detailed explanations at each step.

Understanding Passive Voice and Its Importance

What Is Passive Voice?

Passive voice is a grammatical construction in which the object of an active sentence becomes the subject of the sentence, and the verb is expressed in the past participle preceded by the appropriate form of the verb "to be." The focus shifts from the doer of the action to the receiver or the action itself.

Active voice example:

The city built the new sports centre.

Passive voice example:

The new sports centre was built by the city.

Why Use Passive Voice?

Passive voice is especially useful in formal writing, where the emphasis is on the action or the object rather

than the subject performing the action. It also helps to maintain objectivity, which is essential in journalistic and analytical articles. In the context of the sports centre, passive constructions are often used to describe processes, features, and achievements without necessarily highlighting who performed the action.

The Structure of Passive Voice

The typical structure of a passive sentence is:

Subject + form of "to be" + past participle + (optional) "by" + agent

The choice of tense determines the form of "to be" used:

- Present simple: is/are/am
- Past simple: was/were
- Present perfect: has/have been
- Future: will be
- Past perfect: had been

Understanding these forms is vital for correctly filling in blanks with the appropriate passive form.

Analyzing the Construction of the Article: "A New Sports and Athletic Centre"

Overview of the Centre

The new sports and athletic centre has been designed with state-of-the-art facilities to cater to athletes, students, and community members. The project has involved various stages, from planning and construction to final inspection and opening ceremonies.

Key Features and Facilities

The centre includes multi-purpose courts, a swimming pool, a modern gymnasium, an indoor running track, and dedicated spaces for youth and disabled sports. These features are described using passive constructions to emphasize the actions and processes involved in their establishment.

Filling in the Blanks: Application of Passive Forms

Below, we explore typical sentences related to the sports centre, with blanks that require correct passive forms of verbs in brackets. Each sentence is analyzed for tense, voice, and appropriateness.

1. Construction and Development

- The new sports centre _____ (complete) last month, after two years of construction work.

Expected answer: was completed

Explanation: The sentence is in the past simple tense; the passive form uses "was" + past participle.

- The foundation _____ (lay) by a team of experienced engineers.

Expected answer: was laid

Explanation: Past simple passive, focusing on the action of laying the foundation.

- Several advanced facilities _____ (install) during the renovation process.

Expected answer: were installed

Explanation: The plural "facilities" takes "were" + past participle.

2. Features and Amenities

- The indoor sports halls _____ (equip) with modern lighting and sound systems.

Expected answer: are equipped

Explanation: Present simple passive, indicating ongoing or general facts about the facilities.

- A new swimming pool _____ (design) by leading architects to meet international standards.

Expected answer: was designed

- The gym equipment _____ (update) regularly to ensure safety and efficiency.

Expected answer: is updated

3. Opening and Inauguration

- The sports centre _____ (officially/open) by the mayor during a grand ceremony.

Expected answer: was officially opened

Explanation: Past simple passive, emphasizing the event of opening.

- Many local athletes _____ (welcome) to use the facilities free of charge during the first month.

Expected answer: were welcomed

- The centre _____ (announce) as the newest addition to the city's recreational infrastructure.

Expected answer: was announced

4. Operational and Maintenance Aspects

- The entire complex _____ (maintain) by a dedicated team of staff.

Expected answer: is maintained

- Regular training sessions _____ (schedule) to improve user safety.

Expected answer: are scheduled

- The new policies _____ (implement) to promote inclusivity and fair play.

Expected answer: are implemented

5. Impact and Community Engagement

- The sports centre _____ (regard) as a vital resource for promoting healthy living.

Expected answer: is regarded

- Many community events _____ (organize) in the sports halls throughout the year.

Expected answer: are organized

- The project _____ (fund) by the local government and private sponsors.

Expected answer: was funded

Detailed Explanations for Each Section

Construction and Development

In the construction phase, passive voice is predominantly used to describe the actions taken by various teams. For example, "The foundation was laid by a team of experienced engineers" emphasizes the action rather than the agent, which is typical in technical reports or formal descriptions.

Features and Amenities

Describing the facilities involves present tense passive forms, such as "The indoor sports halls are equipped with modern lighting," which convey ongoing features and standard procedures. This usage underlines the continuous nature of maintenance and updates, critical for the facility's operations.

Opening and Inauguration

Events like openings are narrated using past tense passives to highlight completed actions. For example, "The sports centre was officially opened by the mayor" focuses on the event itself rather than the person performing it.

Operational and Maintenance Aspects

Maintenance and operational procedures are expressed in the present simple passive, indicating routines or ongoing processes. This form underscores the continuous effort to keep the centre in optimal condition.

Impact and Community Engagement

Expressions like "The sports centre is regarded as a vital resource" employ passive voice to reflect societal perceptions, emphasizing the centre's importance without specifying who holds these views.

Significance of Correct Passive Construction in Reporting and Analysis

Using the correct passive form enhances clarity and professionalism in journalistic and analytical writing. It allows the writer to focus on actions, processes, and facts, which is especially important when describing infrastructure projects, features, and community impact.

Examples of Common Mistakes

- Incorrect tense usage, such as "The facilities are install" instead of "are installed."
- Omitting the auxiliary verb "be" in passive forms, leading to grammatical errors.
- Confusing active and passive voice, which can distort the meaning.

Best Practices

- Always identify the tense required by the context.
- Use the past participle form after the correct form of "to be."
- Maintain consistency in tense throughout the description.
- Focus on the object or process being described when employing passive voice.

Conclusion

The development of a new sports and athletic centre represents a significant achievement for any community, contributing to health, recreation, and social cohesion. Accurately describing such projects using the correct passive forms of verbs is essential for clarity, professionalism, and effective communication. Whether detailing construction processes, features, or community impact, mastering the passive voice enables writers and speakers to convey information precisely and confidently. By understanding the rules and nuances discussed in this article, readers can enhance their grammatical proficiency and produce polished, informative reports or reviews about infrastructural developments and similar projects.

Final Remarks

Filling in the blanks with the correct passive form of verbs is more than an exercise in grammar; it is a vital skill for articulating complex information clearly. As demonstrated in the context of the new sports

and athletic centre, passive constructions help highlight the significance of actions taken and features established, making the narrative more objective and authoritative. Continued practice and attention to detail will ensure that descriptions of such important projects are both accurate and compelling.
